Sub.-Maths

Class –II A+B

Sub.Tr.:- Pragya

Ch.— Multiplication (Word Problem)

Write the statements and find the product:-

(One is done for you)

1.Ramesh gave 4sweets to each of his 12classmates on his birthday. How many sweets in all did he distribute?

Solution:- Number of classmates=12

Number of sweets given to each =4

Total numberof sweets distribute = $12 \times 4 = 48$

Therefore,Ramesh distributed 48 sweets

T O

1 2

× 4

4 8
