## Natural Vegetation and Wildlife Class 9 Extra Questions and Answer Geography Chapter 5 Very Short Answers Type

Question 1.

Define natural vegetation or virgin vegetation.

Answer:

Natural vegetation refers to a plant community which has grown naturally without human aid and has been left undisturbed by humans for a long time. This is termed as virgin vegetation.

Question 2.

Explain the terms—endemic or indigenous species and exotic plants.

Answer:

The virgin vegetation, which are purely Indian are known as endemic or indigenous species but those which have come from outside India are termed as exotic plants.

Question 3.

How can you say that the nature of land influences the type of vegetation?

Answer:

The type of vegetation depends on the nature of land. The fertile level is generally devoted to agriculture. The undulating and rough terrains are areas where grassland and woodlands develop.

Question 4.

What is called a biome?

Answer:

A very large ecosystem on land having distinct types of vegetation and animal life is called a biome. The biomes are identified on the basis of plants.

Question 5.

Name the regions of India where the tropical evergreen forests are found.

Answer:

The Western Ghats and the island groups of Lakshadweep, Andaman and Nicobar, upper parts of Assam and Tamil Nadu coast.
