Question

What is recycling of waste things? Give some examples of recycling of waste material.

Answer:

Recycling of waste material is to make the waste material reusable. The following photo gives several examples of recycling.

Fig. 7.3

Recycling is not a new thing. People like the man in the photo above have been recycling paper, metal, glass and plastic for a long time. The kabadi wallah plays a major role in recycling household plastic and paper, including your notebooks.
